For PVUSD school personnel who serve on district Care and Concern Teams and PVUSD Nurses

O83336 - 08-August-2011 to 08-August-2011

Description: For PVUSD school personnel who serve on district Care and Concern Teams and PVUSD Nurses

Paradise Valley Unified School District
Care and Concern Team members have received previous training on the appropriate strategies and intervention tools to incorporate when providing emotional support to students, staff and parents who have experienced a traumatic single incident event in their school community. These skills have been utilized effectively by all four district Care and Concern Teams when asked to assist district schools in the recovery phase of crisis which typically has been the unexpected death of a fellow classmate or teacher.

This workshop will expand on that training with a specific focus relative to responding to a moderate to large scale crisis situation.

This workshop will:

- review the intervention tools of CISM
- review the components of a CISM strategic plan
- review CISM incident Command System (ICS) components

The workshop will conclude with a table-top exercise of a major event occurring at a school that taxes the resources of the district's Care and Concern Team in their

response to the event.

C70443 - Ian Jukes - Understanding the Digital Generation AM or PM Sessions

Choose either the AM or PM session.

O12658 - 08-August-2011 to 08-August-2011

Description: Strategies That Work

Because of digital bombardment and the emergence of the new digital landscape, today's youth process information, interact, and communicate in fundamentally different ways than any previous generation before them. Meanwhile many of us, having grown up in a relatively low-tech, stable, and predictable world, are constantly struggling with the speed of change, technological innovation, and the freedom to access the overwhelming sea of information online—all defining characteristics of the digital world of both today, and the swiftly-approaching future. *Strategies That Work* provides a comprehensive profile of several core learning attributes of digital learners, and the core teaching, learning and assessment strategies that can be used to appeal to their digital lifestyle and learning preferences. You'll gain a clear understanding of various research-based strategies to optimize learning for the digital generation in the new digital landscape. This session is based on the books *Understanding the Digital Generation: Teaching and Learning in the New Digital Landscape*, and *The Digital Diet: Today's Digital Tools in Small Bytes*, from the 21st Century Fluency Project.

O19615 - 08-August-2011 to 08-August-2011

Description: 21st Century Fluencies for the Digital Age

Powerful technologies and information systems have caused facts to become obsolete faster, and knowledge built on these facts to become less durable. InfoWhelm is breaking down the boundaries between conventional disciplines, altering the very fabric of our society, and affecting the way we work, play, communicate, view our fellow citizens, how we learn, and what's important for us to know. Yet schools in their structure, operation, curriculum, pedagogy, and assessment models remain largely the same as they have for decades. In *21st Century Fluencies for the Digital Age*, you'll learn why it's essential that students develop essential 21st century fluency skills to operate in the new living, working and learning environments of the 21st century, and how these skills can be taught in a structured manner at every grade level and in every subject area, and be the responsibility of every teacher throughout the entire school experience. Based on the upcoming book *Literacy is Not Enough: 21st Century Fluencies for the Digital Age*, from the 21st Century Fluency Project.

Here's your chance to build your supportive network of Kindergarten Teachers, refresh your enthusiasm for teaching and participate in exciting hands-on interactive sessions.

O12357 - 23-August-2011 to 24-April-2012

Description: Here's your chance to build your supportive network of Kindergarten Teachers, refresh your enthusiasm for teaching and participate in exciting hands-on interactive sessions. Take this opportunity to put what you learn into action while growing personally and professionally by using innovative and practical instructional methods that will enrich your teaching environment. Be part of a fun packed year incorporating music, movement instructional tools, make'n takes, motivational games, technology, learning links and much more. There will be many fresh ideas to use that boost student achievement across the curriculum.

Key Kindergarten topics include: math fluency, writing, science & social studies, classroom management, student engagement, centers, classroom time savers, organization tips, assessment, following the curriculum map, and cooperative learning structures.

By using these instructional techniques, we will be turning our students into 21st Century learners while cultivating world-class thinkers.

Each year this conference grows and changes in accordance with your needs. Dates and locations are subject to change!
