

Outside Testing Results

Results of gifted testing provided outside of the PV Schools should be sent to the PV Schools Gifted Education Department for consideration. If the outside testing evaluation was provided by a psychologist, the scores must be accompanied with the full psychological evaluation. The full report will provide clarification of the results and contact information of the evaluator, if needed. Previous testing provided by another school district, whether inside or outside the state of Arizona, should also be sent to the PV Schools Gifted Education Department.

Outside test results should NOT be sent to the individual schools. The PV Gifted Education Department will provide the schools with the results upon evaluation of whether or not the test scores qualify the student for services, as based upon criteria established by the Arizona Department of Education.
